DATA SHEET

MPVC-6B-AK

Product Series: MPVC

Product Type: Inline Check Valve Cleanroom

Housing Material: Acetal

Diaphragm Material: 0.030" Kalrez

Inlet: Natural Acetal Celcon M90
Outlet: Black Acetal Celcon M90

Max Operating Temp: 230.00°F / 110.00°C Min Operating Temp: -40.00°F / -40.00°C

Product SKU: 001050203

Physical Properties

Size and Weight: 1.565 Long 0.765 Wide, 3.48g

Max Operating Tensile Stress: 50 lbs

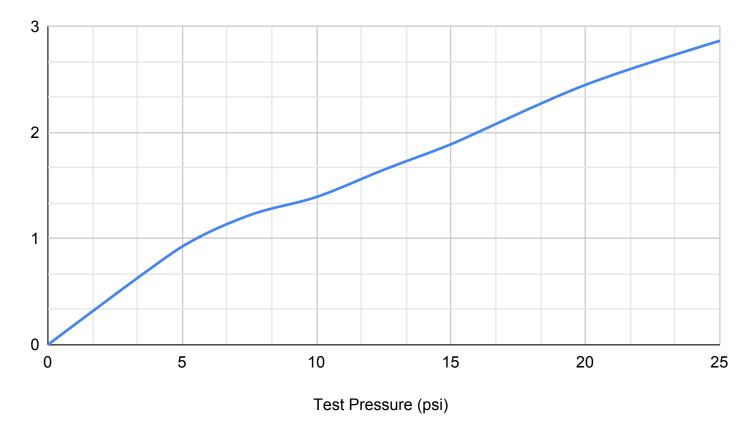

Max Allowable Leak Rate: 0.009 cm^3/sec @ 65 psi (air)

Max Operating Pressure: 65 psi (air)

Cracking Pressure: 0.0 psi (Normally Open)
Required Sealing Back Pressure: Less than 0.1 psi (air)

Flow Rate (Gpm) vs. Test Pressure (Psi)

Flow Rate (gpm)

Chemical Compatibility Information

Inline diagphram type check valves, all types of filters, self-sealing check valves, ball type check valves, and spring loaded check valves are all products that can, and typically do, contain multiple types of different materials. The chemical compatibility of the whole product is limited to those chemicals which are compatible with all of the materials present in the product. Pneuline has compiled an extensive list of various chemical compatibility ratings for the different materials that we use to manufacture our products, and have provided a list of chemical compatibility ratings for each specific product based on the materials used in that product.

The rating system is as follows:

- A = Excellent -- The product is fully compatible with the chemical and is recommended for continuous use within the normal operating parameters of the product (temprature, pressure, etc).
- **B = Adequate** -- The chemical causes a minor effect to the product, slight corrosion or discoloration, minor loss in performance or slightly shortened operating lifespan.
- C = Not Ideal -- The chemical has a pronounced effect on the product and will degrade it. Material softening, swelling, loss of strength, corrosion, and discoloration may occur. Use only for limited timespans and replace often.
- **D = Severe Effect** -- The chemical has a severe adverse affect on the product and will likely destroy it. Not reccomended for use.
- N/A = No Data Available -- One or more of the materials in the product has an unknown compatibility with the chemical.

Chemical Substance	Rating	Chemical Substance	Rating
Acetaldehyde	Α	Barium Carbonate	Α -
Acetamide	Α	Barium Chloride	Α
Acetic Acid	D	Barium Hydroxide	D

Amyl Acetate	В	Chlorine Water	D
Amyl Alcohol	Α	Chlorine, Anhydrous Liquid	В
Aniline	Α	Chloroacetic Acid	D
Aqua Regia (80% HCl, 20% HNO3)	D	Chlorobenzene (Mono)	D
Arsenic Acid	D	Chloroform	Α
Asphalt	В	Chlorosulfonic Acid	D

The information in this chart has been compiled from several sources and as such Pneuline makes no guarantee as to the accuracy or completeness of the information. This chart is ONLY to be used as a guide in selecting the appropriate product for a particular use case. A product's resistance to chemical exposure will vary based on a variety of factors including: temprature, exposure time, quantity, concentration, and purity of chemicals, presense or absence of catalyzing agents, and pressure. Ratings listed in this chart apply for a limited exposure time (normally 48 hours) and as such Pneuline offers NO warranty (express or implied) that a particular product will perform adequately in a given environment.
